

## Description

Yellow (Lime) reflective tape with perforation for extra breathability offers flame retardant protection certified by EN 469. High visibility certified by EN 20471. Can be sewn on FR-clothing or Firefighters jacket/pants. We produce and sell XM-7104/10P Flame resistant reflective tape with high quality and at very competitive price. This reflective tape does not burn or ignite even after 50 domestic wash cycles at 60°C.

## Product Construction

This Reflective Material is a Cotton Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing

## Product Detailed Information
