

Reflective Tape Properties

REFLECTIVE TAPE	Backing		Domestic wash
XM-6007C Pro			

Description

Segmented Silver heat transfer reflective trim with excellent retro-reflectivity. Features extra breathability due to segmented design. It is recommended to use for EN 20471 knit clothing to have safe, functional and comfortable workwear. By means of a heat press or by simple ironing you can add this reflective trim to workwear adding safety and style at work.

Product Construction

The performance of XM-6007C Pro goes along with its durability, providing high reflectivity after tens of washes. Initial reflectivity of the tape is very high for a segmented tape, $R=465 \text{ cd/lx}\cdot\text{m}^2$ and after 50 washes it is still relatively high, $R=170 \text{ cd/lx}\cdot\text{m}^2$. As soft-shell fabric stretching, XM-6007C Pro tape is easily stretching along with the fabric. The tape is applied by Heat Press or Iron-on to EN 20471 vests, jackets, pants and increases the visibility of workers.
